

Dan Oravasaari

Generative AI Artist | AI Image & Video Production | Storyboards & Previs

Sacramento, CA (open to remote) | [linkedin.com/in/danoravasaari](https://www.linkedin.com/in/danoravasaari)

Shot Reel (YouTube) | github.com/IsItDanOrAi

SUMMARY

Generative AI artist with a traditional art foundation in graphite, acrylics, and clay, working with AI since Stable Diffusion's 2022 debut. Makes storyboards, on-screen assets, and VFX shots for film and TV in ComfyUI, Midjourney, and Kling, including 300 storyboard frames for a full script in one week. Sets up ComfyUI pipelines and trains the team on them. Created On-Set Studio, a virtual soundstage that stages, lights, and shoots 3D scenes for image and video models.

SKILLS

Capabilities: text-to-image, text-to-video, image-to-video, video-to-video, lip-sync and dubbing, character consistency, head replacement, upscaling, prompt engineering, storyboarding, previs, VFX, video editing

Commercial AI Tools: Midjourney, Kling AI, Veo, Runway, Hedra, ElevenLabs, Topaz; familiar with Seedance

ComfyUI & Open Models: custom workflows and node packs, API nodes via Comfy Cloud, Flux.2 Klein, MiniMax H3, LTX 2.3/2.5, Krea 2, ControlNet, LoRA, IC-LoRA, IP-Adapter, Qwen3-VL (via Ollama), SAM 3, Depth Anything, XTTS

Art, Editing & 3D: Adobe Photoshop (20+ years), Adobe Premiere Pro (10+ years), concept art, drawing, painting, sculpture, Krita AI, Unreal Engine 5, Mixamo, Gaussian splats; familiar with DaVinci Resolve, Blender, and Cascadeur

Tool Building: AI-assisted software development (vibe coding with Claude); reads basic Python; studied Java in college

EXPERIENCE

AI Artist & Storyboard Artist | **GammaTime** | Remote, Freelance

Sep 2025 - Present

App-based TV production company making shows with AI and real actors

- Storyboarded a full script in one week, delivering 300 AI-generated frames that set the shots for *Miracle on Dream Street*, a long-form Christmas special that had fallen behind schedule.
- Created the AI stills episodes cut to for photographs and referenced moments, around 30 in a single episode.
- Worked on several shows, including documentary-style true crime, using Midjourney, ComfyUI, and Photoshop.

Selected Freelance Contracts

2024 - 2026

ComfyUI Workflow Developer | **Private Client** | Remote

Jul 2026 - Aug 2026

- Built a ComfyUI workflow that turns a photo of anyone into a stylized version of themselves: the client's male or female template with the head replaced in its style, skin tone matched, and pose and outfit untouched.
- Automated it end to end: one photo plus a gender selection returns a consistent result, no manual work per image.
- Combined SAM 3 head detection, Qwen3-VL (via Ollama) head descriptions, and Flux.2 Klein image editing.

AI Video Artist | **The Magnificent Ambersons Recreation** | Remote

Apr 2026 - May 2026

- Worked directly with the producer on proof-of-concept shots for a funding pitch to rebuild the film's lost footage with AI; helped recreate one shot using LTX 2.5 in ComfyUI.

Software Contractor | **Copley** | Remote

Oct 2025 - Nov 2025

- Designed an AI product photography pipeline in ComfyUI: any product image becomes a new shot and background.
- Integrated the workflow end to end and taught the team how to use ComfyUI.

Director of Artificial Intelligence | **Sucasas Cinema**

Mar 2024

- Took over a stalled VFX package one week from the deadline, delivering 20+ shots on time, roughly 90% of the film.
- Given broad creative control within the author and director's vision, integrating AI-generated characters, creatures, and environments using ComfyUI, AnimateDiff, ControlNet, and IP-Adapter.

Animator | **TCL Research America**

Sep 2024 - Jan 2025

- Created AI-driven facial animation and lip-sync for digital short films on TCL TV and YouTube.
- Produced photorealistic scenes using advanced rendering techniques and motion capture, aligned to narrative timing.
- Integrated AI tools for real-time multilingual dubbing and adaptive content workflows.
- Collaborated with creative teams to apply emerging AI film tools, including Midjourney and Kling AI.

PROJECTS

On-Set Studio | Solo Developer

1.0.0 released Sep 2026

Virtual soundstage node pack for ComfyUI, free to use | github.com/IsItDanOrAi/ComfyUI-On-Set-Studio

- Built a 3D stage inside ComfyUI for Mixamo-rigged characters, sets, lights, and cameras that exports pixel-aligned ControlNet passes (depth, normal, canny, OpenPose), mattes, beauty renders, and scene JSON for stills or video.
- Features include a camera rail and shot system with a multi-camera View Finder, lighting rigs with 19 portrait presets and physical bounce, Gaussian splat set kitbashing with character occlusion, reference-plate camera matching, and text-to-motion animation through NVIDIA's ARDY.
- Researched, designed, and built it solo in three months, shipping 1.0.0 publicly with a guide written for LLMs so users can ask an assistant how to use it.

ComfyUI-ExLoadout | Solo Developer

- Node pack for reading and writing Excel spreadsheet data inside ComfyUI workflows.

ADDITIONAL EXPERIENCE

Computer Operator | ADP

Oct 2018 - Jul 2022

Promoted from temp to running a payroll check and W-2 production department independently; Employee of the Quarter (2021); essential worker through COVID-19.

Senior Guest Advisor (Keyholder) | GameStop

Nov 2016 - Jul 2022

Promoted from holiday hire into management; handled store marketing, inventory counts, bank deposits, and staff training.

Senior Editor | PlayStation LifeStyle

Nov 2011 - Sep 2015

Managed a multinational writing team, editing, embargoes, and scheduling; hosted the site's podcast; implemented SEO strategies that grew site traffic.

Editor (Freelance) | CraveOnline Media

Jul 2013 - Sep 2015

Gaming coverage, reviews, and interviews, plus interactive features built to drive reader engagement.

Graphic Designer (Freelance) | Last Man Standing Productions

Jan 2011 - May 2014

Collectible card game art across multiple releases, including art of real tournament winners; convention guest of honor.

Distribution Coordinator | Safety-Kleen

Sep 2011 - Jan 2013

Managed DOT-compliant hazardous materials shipping logistics across CA, NV, and TX.

Student Assistant | California Integrated Waste Management Board (CalEPA)

Jun 2006 - Aug 2008

Business Services and Accounting; built an Excel fleet tracker, audited used-oil rebate claims, trained new assistants.

EDUCATION & CERTIFICATION

B.A. Psychology, Minor in Studio Art; Computer Science coursework | California State University, Sacramento

Generative AI with Large Language Models | DeepLearning.AI and Amazon Web Services, 2023
